Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

C/Complex: The proenzyme forms a complex with C4a and is activated by cleavage into C2a, C/Function:
C/Function:
A/Description: cleaves complement C3 and complement C5 alpha chains
A/Pathway: complement classical pathway
C/Superfamily: complement B/C2; complement factor H repeat homology; trypsin homology; v
C/Keywords: alternative splicing; complement classical pathway; duplication; glycoprotei
F1-18/Domain: signal sequence #status predicted <SIG

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    Sequence:
         Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            DB
